SUMMARY

I am a junior web developer with 2 years of IT experience in both front-end and back-end development. I am a creative problem solver and a team-oriented specialist who turns ideas into reality using modern technologies, clean code, and user-friendly design principles.
I have hands-on experience in both development and business, utilizing web solutions. I am deeply motivated to advance my knowledge in React, Node.js, and database technologies. Currently, I am actively seeking opportunities to join a dynamic team within a company known for its great atmosphere and collaborative environment.
